Bootstrap 4 templates ecommerce

NEW: Food Delivery Demo NEW: Single Post no Sidebar Template UPDATED: Bootstrap to the latest stable version 4.5.0 UPDATED: All plugins, npm modules and dependencies to the latest versions UPDATED: Modified CSS class of transparent navigation bar from navigation panel transparent navigable navigable craft. Updated gluing featureNavbar() inside theme.js UPDATED: ajaxifySubscribeForm() inside theme.js. Rewrite the code from jQuery to Vanilla JavaScript UPDATE: Revised PUG Dependency Template Structure: Moved partial navigation sheet and footers from layout.pug to page templates. Now the inheritance template works by using a block keyword. These changes have made the build process 1.5x faster when you change something in the navigational or bottom. Plus, you now have more flexibility to set up navigation bars and footers for individual pages. UPDATED: package.json and gulpfile.js files. Now all 3rd party plugins and libraries are installed automatically via npm when you run the nPn installation command (previously manually) and moved from node_modules folder DIST from Gulp to project init. Read more about how to add new vendor plugins to the project in this article UPDATE: Getting started and component documentation: Fixed components code examples. Updated section: Navigation bar / Page title / Footer variants (Pug). Added section: Install vendor plugins with npm and Gulp UPDATED: Sketch file: added new food delivery service demo front page impleme FIXED: Small bug fixes and improvements v1.3 – February 29, 2020 NEW: Grocery store Demo NEW: Single Product/Brand Store. View demo NEW: Navigation bar with page menu. See a live example on the grocery store's demo page NEW: Transparent navigation version. See the live example of a demo page of a product/brand Store NOVA: Javascript behavior when radio buttons behave like tabs by switching related content. See the live example on the demo page of one product/brand (Select style section) NEW: Added blank status for the basket drop-down menu. See live example of single product/brand Demo page UPDATED: Replaces Salvatore.js with Shuffle.js and images Ordered.js for masonry grid (especially blog network) layouts UPDATED: Color presets (radio buttons) now change labels dynamically via Javascript. See it in action on the pages with one product of the store v1 and v2 UPDATE: Added new icons in the Cartzilla font icon UPDATED: Sketch file with new demo page design mockups UPDATED: Security patch: Added rel=Noopener to all links with purpose = '_blank' attribute. For more information Read this article UPDATE: Module node for the latest fixed versions: Toolbar style: Removed padding below, which is equal to the height bar from the default body. Now you can add the lower pad to the body by applying a CSS class bar with body support bar. If you use PUG it is applied automatically if var isToolbar = true is added to a specific page template or globally activated through templates/helpers/config.pug. This is done to ensure that you can remove the bottom pad from the body without editing kernel theme styles if you do not need manually FIXED: SCSS cards in theme _variable.scss. Special thanks to Kevin Ramajarak for the fixed repair proposal: Small bug fixes and improvements v1.2 - December 20, 2019 NEW: A new Toolbar for handheld devices has been added that is fixed to the bottom (similar to iOS) and holds all important buttons such as Menu, Basket, Wish List, Side Motors, and more. This will improve the performance of users of portable devices. NEW: Added a .gitignore file to a download package that tells git which files (or models) it should ignore. Make sure that you have enabled the visibility of hidden files in the system. UPDATED: Navigation bars (Headers): added tooltips for action buttons. Added a button for a separate wish list for cases where the wish list is available not only for registered users. UPDATED: 404 Error Page Templates Updated: JavaScript Plugins to Latest Versions UPDATED: Node modules next to latest fixed versions: Documentation typographical errors and mis content FIXED: Minor bug fixes and improvements v1.1 – November 30, 2019 NEW: Digital Products Market Demo NEW: Market Seller/Dashboard NEW: Store Website. Demo preview NEW: One product page v2. View demo NEW: Product comparison page (table). Demo New Review: Navigation Bar Versions for: Market and Electronics Store NEW: Footer Version for: Market NEW: Quick View Pop-up Pop-up v2 (for Electronics Store) NEW: 404 Error Page Template (Text Variant). View demo new: Component charts. View demo NEW: Countdown timer component. Demo New Review: Digital (Downloadable) Product Card NEW: Drag and drop File Upload. See updated form component page for more information updated: Bootstrap to latest version 4.4.1 UPDATE: Character startup item. Added animations to the slider text layers UPDATED: Font icon. Added new icons to the UPDATE COLLECTION: _variables.scss Added \$path font variable. Now it's easier to change the theme font _user-variables.scss UPDATE: Sketch file. Added new page models UPDATED: Documentation and components fixed: Small bug fixes and improvements v1.0 - October 21, 2019 Rated 4.9 out of 5 based on 138 customer reviews Review Live Download this get top webhosting template for \$3.95/mo only Obaju is a free and complex Bootstrap 4 template for your next ecommerce with projects. If you like it, call me! design quality What a good man's job, congratulations! Design quality Design is really beautiful and chosen by the site owner and by me as a website designer / developer. It's not too fantastic, although flip can be too much on a retail page with many products. I really hope that the upgrade to bootstrap 5 will be easily possible and that this template will remain base for webshops! I am in the process of implementing a well-visited international gardening site in 3 languages. Good job, Ondrez! Design quality Such a great template, I love it! Quality design quality design design quality design It's a great template, we started using it immediately!!!! Design quality ecommerce template is a lot of help for me. Template provided me with all the functionality of ecommerce with Bootstrap design ... Thanks quality design Quality code quality, making it multifunctional and flexible. Thanks quality design Yes Feature Availability I was looking for a button type and the template I bought did not have it. Then I had an idea to look at another project of yours and find it. That's very good. Quality Design Customization Design Quality muito bom, ótimo modelo, estou usando ele not www.leadsis.com.br design Quality Very good design Quality Lovely clean design. No code. Well laid out design quality very good and nice design quality template I like the quality of the design and adaptability. That's a great job!
